### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Michael Johnson 07/17/06.

The application has been amended as follows:

In the claims:

Claim 20: A method of driving a weak write test mode (WWTM)-equipped static random access memory (SRAM) comprising:

generating a bias voltage and applying the generated bias voltage to a gate of weak write pull-down transistor of a write driver while conducting a WWTM test of the SRAM; and

generating a logic high output signal and applying the logic high output signal to the gate of the weak write pull-down transistor while in a default mode when not conducting the WWTM test of the SRAM,

wherein the bias voltage has a selectable magnitude different from a magnitude of the logic high output signal.

Claim 21: The method of driving of claim 20, wherein the bias voltage selectable magnitude modulates an effective ON state resistance of the weak write pull-down transistor, such that a threshold of a detected memory cell failure is adjustable by selecting a magnitude from among a plurality of selectable magnitudes.
